

## Emulsions

### Si tone 700

SI-TONE 700 is a smooth and excellent matt finish, based on Special Water based Polymer and has very Special additives. Available in white color and wide range of colors by using Tinting machine bases; the technical parameters of colors obtained by mixing colorants to these bases would vary, owing to the colors chosen

### Latex Sealer 1800

LATEX SEALER 1800 is primer, based on water based polymer.

### Latex Sealer 1800

- Good Penetration into the substrate and has good adhesion
- Good workability

- Reasonable Resistance to Water and Alkali
- Imparts good platform for the subsequent topcoats

#### Latex putty

LATEX Putty is based on special water based polymer, with special additives

#### Latex putty

- Excellent Brightness
- Right Consistency and Superior workability
- Offering excellent filling properties for small holes, joints, porous surfaces, etc
- Good sand ability
- Excellent Film Smoothness

#### Acrylic putty

Acrylic Putty is high-grade quality putty, based on strong acrylic containing Water based Polymer

### Acrylic putty

- Reasonably good Brightness
- Right Consistency and Superior workability
- Offering excellent filling properties for small holes, joints, pores, surfaces, etc
- Good sand ability
- Superior resistance to water and alkaline

### Q tone

Q-TONE is a matt smooth finish, based on Water based Polymer

### Q tone

- Good hiding power and brightness

- Good resistance to water and alkali
- Good chalking resistance
- Ability to take more water of dilution
- Long term Durability

Hi tone

HI-TONE 2700 is an attractive matt finish, based on Water based Polymer

Hi tone

- Good hiding power and brightness
- Excellent resistance to water and alkali
- Excellent Chalking resistance
- Superior wash ability
- Imparts excellent Long term Durability
- All these are with accepted odor levels

## Si tone 700

SI-TONE 700 is a smooth and excellent matt finish, based on Special Water based Polymer and has very Special additives. Available in white color and wide range of colors by using Tinting machine bases; the technical parameters of colors obtained by mixing colorants to these bases would vary, owing to the colors chosen

## Si tone 700

- Exceptional hiding power
- Excellent Brightness
- Superior resistance to water and alkali
- Excellent chalking resistance
- Imparts excellent Long term Durability
- All these are with accepted odor levels
- Conforms to Egyptian Standard no. 1539/2008

## Bond 2000

BOND 2000 is a high quality acrylic emulsion semi-gloss product, based on strong water based Polymer

### Bond 2000

- Fresh semi-glossy appearance and its retention
- Exceptional Brightness and hiding power
- Superior resistance to water and alkali
- Excellent chalking resistance
- Imparts excellent Long term Durability
- All these are with accepted odor levels

### Duracril 7000

DURACRIL emulsion is an outstanding top quality waterborne gloss finish, based on the best quality 100% pure acrylic binder.

### Duracril 7000

- Gloss retention

- Good brightness and hiding power
- Excellent resistance to water and alkali
- Very good adhesion
- Imparts excellent Long term Durability

#### Si tone silk

SI-TONE Silk is a smooth and excellent silk finish, based on Water based Polymer and has very Special additives

#### Si tone silk

- Superior resistance to water, alkali
- Excellent resistance to stains
- Good Gloss retention
- Superior workability
- Excellent Chalking resistance
- Imparts excellent Long term Durability
- All these are with accepted odor levels

## Si Tex

Si-TEX texture finish is based on Water based Polymer, available in white color and the required shade can easily be made

## Si Tex

- Very attractive variety of texture can be obtained using different application tools
- Good adhesion
- Good weather and water resistance
- Good filling properties
- Covers surface imperfection

## Si shield matt

Si- Shield Matt is a 100% Pure Acrylic Binder based matt emulsion paint that offers excellent performance for the exteriors and façade

### Si shield matt

- Excellent Dirt Pick-up Resistance due to its unique state-of-the art technology
- Superior flexibility and elasticity that allows bridging of hairline cracks and crevice
- Significant resistance to UV rays, temperature changes and pollution
- Excellent barrier to chloride ions and protect against concrete carbonation
- Superior resistance to water, alkali, efflorescence and other external elements

### Acry star

ACRY-STAR is a silky clear coat produced with high quality acrylic emulsion. It can be applied on special effects paints like Sipestar, any quality matt emulsion, etc. to provide smooth sheen and additional protection against water, stains and even dusty atmosphere

### Acry star

### Hi Krax

HI-KRAX is high-grade quality crack filler; based on strong water based polymer

### Hi Krax

- Excellent for filling large holes in single application
- Good ease of application
- Excellent adhesion

### Uni mix

Uni-mix Colorants series are generic universal colorants, based alkyd systems and water based system. A bunch of 12 colors (Fast Blue 101, Fast Violet 102, Fast Yellow 103, Fast Oxide 104, Fast Yellow Green 105, Fast Green 106, Fast Red 107, Fire Red 108, Orange 109, Turkey Umber 110, maroon 113 and Black 112] covering wide spectrum are offered to cater to the painter's™ requirement. An ideal choice for the customers who want to make their own creative colors, without depending on tinti

### Uni mix

- Exhibits excellent compatibility in latex and alkyd paints
- Reasonably higher color strength

## Duracril 6000

DURACRIL emulsion is an outstanding top quality waterborne gloss finish, based on the best quality 100% pure acrylic binder.

## Duracril 6000

- Gloss retention
- Good brightness and hiding power
- Excellent resistance to water and alkali
- Very good adhesion
- Imparts excellent Long term Durability

## Duracril 5000

DURACRIL emulsion is an outstanding top quality waterborne gloss finish, based on the best quality 100% pure acrylic binder.

## ***Alkyds***

Si Gloss 905

Si Gloss is premium quality gloss finish, based on a high performance alkyd resin using state-of-art technology

Si Matt 1000

SI-MATT 1000 is a high quality matt paint, based on superior alkyd resins. Available in white color and several attractive colors. vary, owing to the colors chosen

Si Gloss 905

Si Gloss is premium quality gloss finish, based on a high performance alkyd resin using state-of-art technology

Gold Crown 300

Gold Crown Semi-Gloss 300 is a decorative enamel finish, based on high quality alkyd resin

## VARISHES

**Si Wood**

SI-WOOD is based on very high performance and superior polyurethane resins

Si Wood

SI-WOOD is based on very high performance and superior polyurethane resins

Ultra clear

Ultra Clear Varnish is based on high performance superior polyurethane resin.

Varno

VARNO is an outstanding high gloss and transparent varnish, based on good types of alkyd resins

***SPECIAL EFFECT***

## Si Glaze

SI-GLAZE is a decorative enamel finish, based on high quality alkyd resin. Available in clear and wide range of colors by using Tinting machine.

## Si Glaze

SI-GLAZE is a decorative enamel finish, based on high quality alkyd resin. Available in clear and wide range of colors by using Tinting machine.

## Stucco

STUCCO is a special texture finish made from Water based Polymer

## Sipestar

SIPESTAR is a decorative multi-color wall finish, based on a special polymer, gives the wall the granite and marble effect

## Acry

Acry-family is a specialty decorative products made from carefully selected raw materials to yield protection combined with rich pearlescent luster. A large Variety of designs can be made using different application tools; also it can be combined with our Uni-Mix colors, if needed. So,

go ahead and give a luxury treat to your walls, proving  
your creativity
